

Google Pay

HOW TO MANAGE YOUR CARDS WITHIN GOOGLE WALLET

You can now add your **Mastercard®** issued by Investbank to your Google Wallet.

Add your card to your Google Wallet with just one click and pay everywhere where Google Pay is accepted – in stores, online and even in your favorite apps.

What is Google Pay?

A secure way to send money fast and pay in stores, online and everywhere where contactless payments are accepted, as well as ATMs, using only your smartphone.

Provides you with the highest form of security when transacting – it does not store any information that can be connected to the card holder.

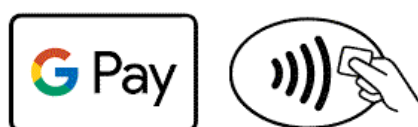

Digitalize your card now and have it on the go in your Google Wallet!

Here's what's necessary in order to add your card to Google Wallet:

- A Mastercard issued by Investbank JSC.
- A devices that supports Android Lollipop 5.0 or newer and Google Play features installed.
- The latest version of Ibank Mobile.

Where can you use Google Pay?

You can pay with Apple Pay everywhere you can see these two symbols:

You can pay in any apps and websites where Google Pay is accepted.

You can also withdraw at any ATM that has the contactless feature and all you need to do is just tap your card and enter your card's PIN code.

In order to pay with Google Pay your device must have NFC integrated!

What are the benefits of paying with Google Pay?

- **Speed** – Adding your **Mastercard®** issued by Investbank to your Google Wallet takes just a few minutes and can be done via the Google Wallet app as well as the Ibank Mobile app.
- **Security** – The number on your now digitalized card does not appear on your device when using it for payments.
- **Convenience** – Expand your payment methods in an innovative way.

How to add your card to Google Wallet?

1. Open your banking app Ibank Mobile. Make sure that you have the last app version installed as well.
2. Go to the “Cards” menu;
3. Choose “Add to GPay” on the card you want to add and follow the instructions;
4. Read and accept the Bank’s terms and conditions for digitalization.
5. At the end of the process you will receive a confirmation that your card has been added to Google Wallet and you can start using it for contactless payments.

In case you do not have or use the Ibank Mobile app, you can add your cards directly via Google Wallet.
